SAFETY

Purging, temperature & pressure control, gas detection, active ventilation (zone free), safety PLC are only some of our safety features of the new X-TOWER series. Safety tested and production monitored by third party organisation.

INTEGRABILITY

With reduced interface connection we are proud to say: „plug & boost“.

A web-based access to the control system offers independent control with your mobile PC or smartphone.

Our X-TOWER series is prepared for IoT integration to improve processes and provide more information about the compression process than ever before.

Easy integration in existing systems.

Hydrogen

Hydrogen

Nitrogen

Electrical power

AIR FLOW TOWER PURGE

With our revolutionary design concept of the forced ventilation and forced exhaust we make sure, that no explosive atmosphere can occur inside the X-TOWER.

Cost and energy efficient gas filling solution

With the new GFS technology, we are proud to introduce an efficient way of Hydrogen compression. The GFS solution is based on our X-TOWER (the heart of compression) with all the advantages.

The ready integration into a 10ft. container solution optimizes the overall availability of the Gas Filling System. The GFS is a plug & boost solution from Maximator which is covering all outdoor requirements from -20°C - +40°C. It is easy to load with fork lifter or crane on a standard truck.

The interface connection for the customer is reduced to a minimum of H₂ supply, H₂ outlet, N₂ supply and electrical power. All other modules for a safe and efficient compression are already integrated. A web-based access to the control system offers independent control with your mobile PC or smartphone.

In addition to our GFS Series, we also provide our GFX-version, which comes with an extra panel to switch the supply source from low to high pressure supply.

XTOWER INSIDE

The Maximator X-TOWER is a modular Gas Compression System, specifically designed for Hydrogen compression up to 900 bar with scalable volume flow.

- Maximum flexibility
- Maximum efficiency
- Maximum safety

... than ever before.

SAFETY

- Nitrogen purging
- Temperature control
- Pressure control
- Gas detection
- Forced ventilation
- Production monitored by third party organisation

... are only some of our safety features to increase the acceptance of operator and integrator.

WATER COOLING

Intelligent and efficient new cooling and tempering concept keep the GFS temperature under control. **The GFS is having the chiller system on board.** Cooling water temperature and flow are measured and supervised by the PLC.

SERVICE MEETS SUCCESS

Reducing of downtime is one of the biggest advantages for our Gas Filling System concept.

The modular design allows to change modules instead of maintaining components. Maximator is providing complete tested and certified modules to exchange the used module.

With standardized electrical and mechanical connection, the maintenance can be planned and realized in a short term.

EXAMPLE CONFIGURATION	1 STAGE SYSTEMS	2-STAGE SYSTEM	3-STAGE SYSTEM
Pressure class	270 bar	540 bar	900 bar
X-Modules	X15	X15 / X30	X15 / X30 / X45
Mass flow (H ₂)*	5 kg/h	10 kg/h	20 kg/h
Power consumption	25 kW	40 kW	55 kW
Dimension (LxWxH) in mm	3.000 x 5.600 x 2.600		
Weight	5.000 kg	5.500 kg	6.100 kg
Control System	Safety PLC + Web application
